Smart ingestible Medicine

**Original Re-inventing Product**

**KO<sub>2</sub>** IS THE  
STUNNING MEDICINE , BECAUSE  
IT PUTS  
FINGERS  
ON THE **CO<sub>2</sub> PULSE** OF THE BODY.  
**KO<sub>2</sub>** INTAKE **RAISES** THE CO<sub>2</sub>  
LEVELS IN THE BLOOD.  
**KO<sub>2</sub>** IS A **KEY REGULATOR** OF  
**INFLAMMATORY REACTIONS**  
DUE TO CONTROL OF CELL'S OXYGEN  
SUPPLY.  
**KO<sub>2</sub>** ALSO REGULATES  
**INFLAMMATORY REACTIONS**  
WITH  
RAPID CHANGES IN **TISSUE AND**  
**FLUID Ph.**

Lack of  $\text{CO}_2$  (carbon dioxide) is **harmful**,  
and is as **fundamental** a component of **living** matter as **oxygen**.

If c a r b o n dioxide **deficiency** continues  
for a **long time** then it can be **responsible** for **diseases**, aging  
and even **cancer**

- **REGULATE** CELLULAR PH,
- **REGULATE WHOLE BODY PH,**
- **REGULATE CELL VOLUME** AND **FLUID SECRETION,**
- **DISPOSE OF** THE BODY'S MAJOR **METABOLIC WASTE** PRODUCT (CO<sub>2</sub>/HCO<sub>3</sub><sup>-</sup>).
- **HEALTHY PEOPLE A DECLINE OF ALKALINE BUFFERS BEGINS AT THE AGE OF 45. BY AGE 90 WE LOSE 18% OF THE BICARBONATES IN OUR BLOOD**
- **REDUCTION OF BICARBONATES IN THE BLOOD IS THE CAUSE OF AGING AND DISEASES.**

The  $\text{K}_2\text{O}$  acts as a **buffer** to  
maintain the  
**normal levels** of  
acidity (**ph**) in **blood** and other  
**fluids** in the **body**

Reverse **Disease** and Save the **Healing**

Hypoxia, or **lack of oxygen in the tissues, is the fundamental cause for all degenerative disease.**

—Dr. Stephen Levine molecular biologist

# ANTI-THROMBOTIC OR BLOOD THINNER EFFECT

Prevents intravascular coagulation of the blood in any part of the circulatory system, as in the heart, arteries, veins, or capillaries.

red blood cells carry oxygen to cells.

and have a protective coating that has an essential function in the health. At the point of tiny capillaries, the red blood cells separate and stay apart, and the protective covering gives them the ability to do this by neutralizing their attractive charge to each other.

If the pH level in blood is too acidic,

it will destroy the protective coating and make them stick together,

not be able to get supplies of oxygen-rich blood and eventually

begin to die from lack of oxygen.

works so **dramatically**  
and exerts **three well-**  
**defined influences:**

1. It is one of the **prime factors** in the **acid-base balance** of the **blood**.

2. It is the **principal** control of **respiration**.

3. It exerts an **essential tonic influence** upon the **heart** and **peripheral circulation**.

**Excess weight** is a by-product of a diet that is **loaded** with **acidic foods**. **Excess fat cells** will contribute to an **increase in levels of estrogen** hormone that cause **ovarian and breast cancer** in **women**.

**PROMOTES  
WEIGHT LOSS**

**Ko2** **regulat** the **levels of**  
**acid, potassium, and salt in**  
**the body are all**  
**regulated by kidneys**

**IMPROVED**  
**KIDNEY**  
**HEALTH**

**Ko2 help body be as  
healthy to help fight  
off cancer  
or prevent its  
development.**

**PREVENTING  
CANCER**

**Ko2 help prevent  
the development of  
heart disease.**

**PREVENTING  
HEART**

by **changing** the **pH**  
of Human Body fluid

**Ko2 kills Viruses**

**KILLS  
VIRUSES**

**acidity sucks minerals  
out of bones, body  
needs calcium to  
maintain the balance of  
pH in body.**

**PREVENTING  
OSTEOPOROSIS**

**too much cortisol cause  
levels of acid to rise,  
Ko2 will allow to take the  
excess stress off your body**

**ELIMINATING  
STRESS  
INDUCES  
PROBLEMS**

The cause of “high stomach acid” or ulcers is really **Helicobacter Pylori**, an acid resistant bacteria, and are killed in presence of **KO<sub>2</sub>**.

—Parhatsathid Nabadalung

MATERIAMEDICA,  
PHARMACOLOGY  
AND THERAPEUTICS  
(BASTEDO PAGE 88)  
CLEARLY STATES  
THAT.....

- When taken **EMPTY** stomach  
**KO<sub>2</sub> dissolves in mucus** and  
**is absorbed as bicarbonate**  
**into the blood to increase its**  
**alkalinity directly.**

CHANGING THE PH LEVEL  
OF BODY  
FROM AN ACID TO AN  
ALKALINE

-When taken **BEFORE food** **KO<sub>2</sub>** reduces the secretion of gastric juice, neutralizes a portion of the **HCl** (hydrochloric acid), liberates the carminative **CO<sub>2</sub>** (carbon dioxide gas).

CHANGING THE PH LEVEL  
OF BODY  
FROM AN ACID TO AN  
ALKALINE

-When taken **AFTER** food  $K_2O$  may neutralize the organic acids and result into opening of a spasmodically closed pylorus (the opening between the stomach and the small intestine); and at the same time  $K_2O$  acts to overcome flatulency (accumulation of gas in the stomach and bowels).

CHANGING THE PH LEVEL  
OF BODY  
FROM AN ACID TO AN  
ALKALINE

-In **hyperchlorhydria** (excess of acid) or In **continuous hyperacidity** and in **fermentative conditions** a dose of **KO<sub>2</sub>** an hour before meals will tend to **prepare the stomach** for the **next meal**.

CHANGING THE PH LEVEL  
OF BODY  
FROM AN ACID TO AN  
ALKALINE

-For the **average person** dose of **kO2** is **one-half hour after meals.**

CHANGING THE PH LEVEL  
OF BODY  
FROM AN ACID TO AN  
ALKALINE

**-A dose of kO2 at bedtime tends to check the early morning acidity, or a dose on arising cleans the stomach of acid and mucus before breakfast. kO2 should be taken with cold water.**

**CHANGING THE PH LEVEL  
OF BODY  
FROM AN ACID TO AN  
ALKALINE**

# WITH ADDED BENEFIT OF ACRIDHANGER

**Doubles the bio-availability of Nutrients or medicine -By increasing the plasma half-life and delays their excretion for increasing therapeutic effects and aims to correct the imbalance of the three “doshas” (VATA, PITTA, KAPHA psychophysical components of human body) that can lead to disease**
